

# Evoluent3 Right

A vertical mouse

 BAKKER ELKHUIZEN

*Work Smart - Feel Good*

## Work relaxed and comfortably with an ergonomic mouse

We aren't always aware of it, but the mouse is the most-used computer accessory. This is why it's important to use the right mouse.

This vertical mouse makes you hold it in a handshake position. This is a natural posture and prevents unnatural wrist bending while providing relief to the forearms.

The handshake position of vertical mice keeps the wrist from bending as much to the side while the forearm also turns inward to a lesser degree (Schmid, et al., 2015). This means that muscle activity in the forearm is less than it would be when using a conventional mouse (Quemelo & Vieira, 2013).
