Work Smart - Feel Good

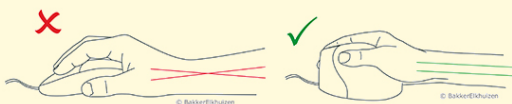

Work comfortably with a vertical mouse

We don't often realise it, but we use the mouse a lot throughout the workday. This is why a good, ergonomic mouse is indispensable.

The Evoluent 4 Right Small is a vertical mouse, so you hold it in the same position you would when giving a handshake. A major advantage of this posture is that the wrist bends more naturally.

The handshake position of vertical mice keeps the wrist from bending as much to the side while the forearm also turns inward to a lesser degree (Schmid, et al., 2015). This means that muscle activity in the forearm is less than it would be when using a conventional mouse (Quemelo & Vieira, 2013).

Ergonomic: good arm and wrist posture.

Motion: works with your fine motor skills. The Evoluent 4 is fast and very accurate.

Unique: you quickly get used to this mouse and immediately notice its advantages.

Grip: the Evoluent series has an improved grip, which increases thumb and pinkie comfort.

Simple: you can easily adjust the cursor speed right away.

Small version: small is for hands up to 178 mm long from the top of the middle finger to the edge of the wrist.

Width	79 mm
Height	74 mm
Depth	101 mm
Weight	161 gr
Product code	BNEEVR4S
