

Evolutent4 Right Bluetooth

An ergonomic Bluetooth mouse

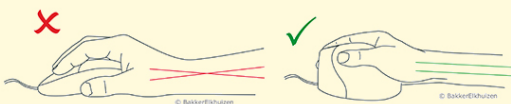

Work comfortably with this vertical mouse

Did you know that the mouse is the most-used computer accessory? This is why it's so important to have a good ergonomic mouse.

The Evolutent 4 Right Bluetooth is a vertical mouse. Because you hold the mouse in a handshake position, you have less lateral wrist-bending and forearm rotation.

The handshake position of vertical mice keeps the wrist from bending as much to the side while the forearm also turns inward to a lesser degree (Schmid, et al., 2015). This means that muscle activity in the forearm is less than it would be when using a conventional mouse (Quemelo & Vieira, 2013).

Ergonomic: good arm and wrist posture.

Bluetooth: even more freedom and comfort.

Motion: the Evolutent4 Right Bluetooth is fast and very precise.

Unique: easy to get used to.

Simple: you can easily adjust the cursor speed right away.

Width	86 mm
Height	81 mm
Depth	106 mm
Weight	195 gr
