

FlexDesk 630N

 BAKKER ELKHUIZEN

Align your documents with your keyboard and screen.

Work Smart - Feel Good

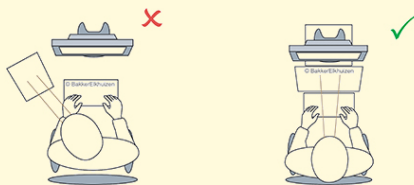

Work in alignment for the optimal ergonomic posture.

You know what it's like: the desk full of documents, your head always turning from left to right to get the information from your documents on the screen.

You can prevent this neck strain by using the FlexDesk. This holder ensures that your documents are aligned with your keyboard and screen, with a minimum of head-turning.

To prevent neck rotation, documents have to be placed between the keyboard and display screen. A sloping work surface reduces flexion of the neck and thus increases work comfort.

Quality: white matte worktop, smooth rails & solid (5 mm acrylate).

Adjustable: the height of the FlexDesk 630N can be adjusted for proper alignment with the screen (110-180 mm).

Efficient: easy to alternate between writing and computer work thanks to the extendable worktop.

Multifunctional: 2-in-1 stand and document holder.

Convenient: the document holder has storage space for a full-size keyboard on the bottom (accessible from the front). This space is 55 mm high.

Ergonomic: short viewing distances between keyboard, documents and screen.

Width	515 mm
