

Goldtouch Ergonomic Mouse

BAKKER ELKHUIZEN

Work Smart - Feel Good

vertical ergonomic mouse

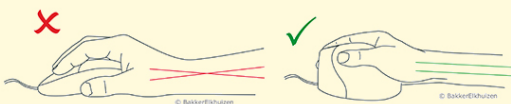

Work comfortably and ergonomically with a neutral posture.

Another mouse in our vertical assortment is the Goldtouch Ergonomic Mouse. This mouse provides good support to the forearms.

You hold the mouse in a handshake position.

The handshake position of vertical mice keeps the wrist from bending as much to the side while the forearm also turns inward to a lesser degree (Schmid, et al., 2015). This means that muscle activity in the forearm is less than it would be when using a conventional mouse (Quemelo & Vieira, 2013).
