

Continuously vertical and horizontal tenting

The Goldtouch Travel Go2 keyboard provides a better split of work between left and right hands.

This keyboard can be folded to make it more portable.

A number of studies have proven that 90% of keyboard users rarely use the numeric pad. With this in mind, this is removed on compact keyboards. This means the mouse can be moved closer to the keyboard. Using a compact keyboard results in reduced discomfort because it reduces reaching for the mouse (Cook, C., et al., 1998). This results in less strain on the shoulder and forearm.
