

InnoDesk

sit-stand desk

The InnoDesk is a motorized sit-stand solution. Our WORK & MOVE (SitStandCOACH en PitStops) software can be linked to our desk.

The software and the sit-stand desk easily 'help' users alternate between sitting and standing postures more frequently and to be more aware of their behavior during computer work.

Switching between sitting and standing while working creates more variation in working posture throughout the day. This leads to less discomfort within the back, neck and shoulders compared to sedentary sitting work a regular table (Choi, 2010; Rabbit et al, 2008;. Hedge and Ray, 2004; Karlqvist, 1998).

Modern design, ergonomic and flexible

With the InnoDesk, BakkerElkhuizen introduces a unique way to demonstrably improve the mental and physical fitness of your staff. The InnoDesk is a multi-featured sit-stand desk, that comes factory equipped with the WORK & MOVE Desk Connector enabling connection to our SitStandCOACH en PitStops Software. Through this software, the user controls the desk via their keyboard and/or mouse, automatically changing to their preferred pre-set sitting or standing height.

Advantages InnoDesk

Compatible

The desk height can automatically be adjusted by means of the WORK & MOVE (SitStandCOACH en PitStops) software supplied. The desk height can also be adjusted at the touch of a button on the desk itself.

Ergonomic

Because the desk is height-adjustable, you can always work at the appropriate sitting and standing height. The huge height range is adjustable from 25.5 - 52.75 inches.

Easy

The InnoDesk is easy to assemble. The patented Twist & Lock system requires no tools so assembling the desk takes no more than 5 minutes.

Design

The desk has a sleek and modern award winning design. The integrated cable management system keeps cables out of sight.

Logistics

Its design makes the desk extremely logistics friendly with 8 complete InnoDesk units easily fitting on 1 pallet. Combined with the very short setup time, considerable savings can be achieved in terms of logistics and build.

Personal preferences

Our software enables the user to save their personal sitting and standing height preferences.

Knowledge Center

Sitting/standing working is becoming increasingly popular. But what are the actual effects of switching between working standing up and sitting down? Does it only affect your health or does it have other effects? Its impact has been researched by conducting several surveys of call center employees.

Process optimisation and narrow targets improve the performance of...
