

Q-riser 100

flatscreen and CRT monitor stand

 BAKKER ELKHUIZEN

Work Smart - Feel Good

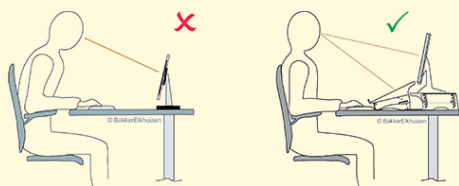

Puts the monitor at a comfortable working height

The Q-riser 100 monitor stand raises monitors to a comfortable working height.

Creates extra storage space underneath monitor.

An optimum monitor position leads to lower discomfort and complaints involving the neck (Kumar 1994 McKinnon 1994, Marcus 2002). Positioning the monitor too low can lead to heightened flexion of the neck and increased muscle tension. A screen position that is too high can also lead to problems.
