

Q-riser 140

Sturdy height adjustable monitor stand for comfortable viewing level, improving body posture.

 BAKKER ELKHUIZEN

Work Smart - Feel Good

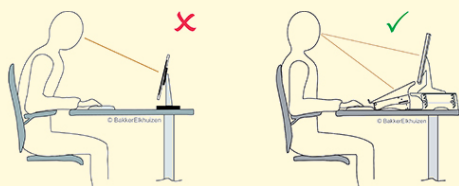

Puts the monitor at a comfortable working height

The Q-riser 140 monitor stand is height adjustable and creates room underneath to store the keyboard or a laptop.

Achieve perfect, ergonomically correct screen height for all with this monitor riser.

An optimum monitor position leads to lower discomfort and complaints involving the neck (Kumar 1994 McKinnon 1994, Marcus 2002). Positioning the monitor too low can lead to heightened flexion of the neck and increased muscle tension. A screen position that is too high can also lead to problems.
