

Rockstick 2 Mouse

Wireless

Ergonomic vertical mouse

Work in a neutral and comfortable position

A good mouse prevents physical complaints. The best mouse fit varies per person. This is why there are many types of ergonomic mice to choose from.

With the vertical anti-RSI mouse Rockstick 2 Wireless you adopt a good mouse posture.

The handshake position of vertical mice keeps the wrist from bending as much to the side while the forearm also turns inward to a lesser degree (Schmid, et al., 2015). This means that muscle activity in the forearm is less than it would be when using a conventional mouse (Quemelo & Vieira, 2013).

Unique: you click the mouse by using your hand to move it slightly to the left or right.

Ergonomic: clicking by using your hand reduces tension on the fingers.

Neutral position: the vertical orientation of the mouse keeps the wrist and forearm in a natural position.

Convenient: use it with either your right or left hand.

Comfortable: removable palm support keeps the little finger supported.
