### 3.Hazards Identification

The Most Important Hazards

Adverse Human Health Effects

There are no significant hazards expected with intended use.

Environmental Effects

There are no significant hazards expected with intended use.

Physical and Chemical Hazards

There are no significant hazards expected with intended use.

Specific Hazards

Dust explosion (like most finely grained organic powders)

#### Main Symptoms

##### Acute Inhalation Toxicity

Exposure to excessive amount of dust may cause physical irritation to respiratory tract.

##### Acute Oral Toxicity

Low acute toxicity in animal experiment.

##### Acute Eye Irritation

May cause slight transient irritation.

##### Acute Skin Irritation

May be non-irritant.

##### Sensitization

From test no apparent significant hazards are expected . (Only few cases reported on incidental allergy-related conjunctivitis or dermatitis.)

##### Chronic Effect

Slight pulmonary fibrosis has been reported in rats upon chronic inhalation exposure to a toner at 4mg/m<sup>3</sup> every day for 2 years. No pulmonary change was found at 1mg/m<sup>3</sup>. These findings show that exposure to excessive amounts of powder may cause damage to lungs. However, normal use and handling of this product as intended, does not result in inhalation of excessive amounts of powder.

##### Carcinogenicity

Carbon black and titanium dioxide contained in this product are classified to Group 2B of IARC as the result of inhalation test in use of rat.

But oral/skin test does not show carcinogenicity.

The toner containing carbon black did not show carcinogenicity in chronic inhalation exposure test in use of rat.

In the animal experiment with very high concentration of titanium dioxide (excessive burden of rat's lungs clearance mechanism (overload phenomenon)), the rat alone showed lung tumor. Under a normal use practice, the concentration should be far lower than the above; and it is assumed that there is no such use.

Also, relation between respiratory disease and work exposure of titanium dioxide is not observed with epidemiological survey.

##### The Classification of The Chemical Product

This preparation is not classified as dangerous according to Directive 1999/45/EC.

## 4.First-Aid Measures

#### Inhalation

Remove from exposure to fresh air and rinse mouth with water. Seek medical advice.

#### Skin Contact

Wash thoroughly with soapy water.

#### Eye Contact

Flush with a large amount of water until particle is removed. Seek medical advice.

#### Ingestion

Drink several glasses of water to dilute ingested toner. Seek medical advice.

#### Notes to a physician

Not applicable

## 5.Fire-Fighting Measures

#### Extinguishing Media

CO<sub>2</sub>, dry chemicals, foam or water.

#### Extinguishing Media to Avoid

Not applicable

#### Specific Hazards

Can form explosive dust-air mixtures when finely dispersed in air.

#### Specific Method

No special fire protecting method is required. Sprinkling or fire extinguishers can be used.

#### Protection of Fire-fighters

Wear gloves, glasses, a mask if necessary.

## 6.Accidental Release Measures

### Personal Precautions

Do not breathe in dust.

### Environment Precautions

Do not flush into sewers or watercourses.

### Methods for Cleaning Up

Fine powder may form explosive dust-air mixture. Confirm there is no source of fire and if there is a source, remove it. Sweep up spilled powder slowly and clean remainder with wet cloth. If a vacuum cleaner is used, a dust explosion-proof type must be chosen.

## 7.Handling and Storage

### Handling

#### Technical Measures/Precautions

Not applicable

#### Safe Handling Advice

Do not handle in areas where there is wind or draught, this may cause dust to get into eyes.

Avoid breathing in dust.

### Storage

#### Technical Measures

Not applicable

#### Storage Conditions

Keep out of reach of children.

Store in dry, well-ventilated area, to maintain quality the temperature should not exceed 35degrees centigrade for a long time. Avoid direct sunlight.

### Packaging Material

Not applicable

### Specific Use(s)

Image formation in printing machines or copiers.

## 8.Exposure Controls/Personal Protection

### Technical Measures

Use adequate ventilation. None required with intended use.

### Control Parameters

USA OSHA PEL (TWA) : 15mg/m3 (Total dust) 5.0mg/m3 (Respirable fraction)

ACGIH TLV (TWA) : 10mg/m3 (Inhalable fraction) 3.0mg/m3 (Respirable fraction)

DFG MAK : 4.0mg/m3 (Total dust) 1.5mg/m3 (Respirable fraction)

### Personal Protection

#### Respiratory Protections

None required in normal use. If the limit of exposure concentration is exceeded, use authorised respirator.

#### Hand Protection

Use vinyl or rubber gloves if necessary.

#### Eye Protection

Put on goggles if necessary.

#### Skin and Body Protection

Wear chemical-resistant apron or other impervious clothing if necessary.

### Hygiene Measures

Wash hands after handling.
